

INTERNATIONAL PROGRAMS

Overview

Edison Electric Institute (EEI) International Programs provides the global electric power industry with public policy leadership, strategic business intelligence, and a platform for industry dialogue and collaboration. Through a combination of essential member services and global stakeholder engagement, EEI International Programs is working to support the development of affordable, clean, reliable, and resilient power systems of the future.

Founded in 1933, the Edison Electric Institute is the world's largest global association of electric companies, representing all U.S. investor-owned electric companies and more than 65 international electric companies with operations in over 90 countries.

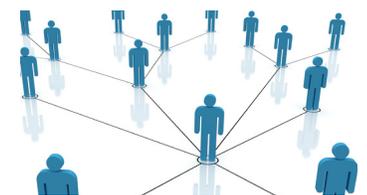

Value Proposition

For electric companies seeking to attract investment, mitigate risk, grow their business, and satisfy customer expectations in a dynamic business environment; visibility, strategic engagement, and influence across a globally-interconnected industry are strategic imperatives. EEI membership supports these imperatives for electric companies and corporate initiatives by providing access to an international network of industry expertise, creating opportunities for accelerated learning and knowledge sharing, and elevating the visibility of member company efforts.

Activities & Projects

EEI International Programs develop and implement a wide range of activities and member resources.

- Conferences and Events
- Policy & Market Analysis
- Webinars & Podcasts
- Advisory Committees & Issue Working Groups
- Data and Resource Libraries
- Thomas Edison International Fellowship Program
- Industry Surveys
- Executive Networking & Peer-to-Peer Dialogue
- Africa Utility Power Sector Initiative

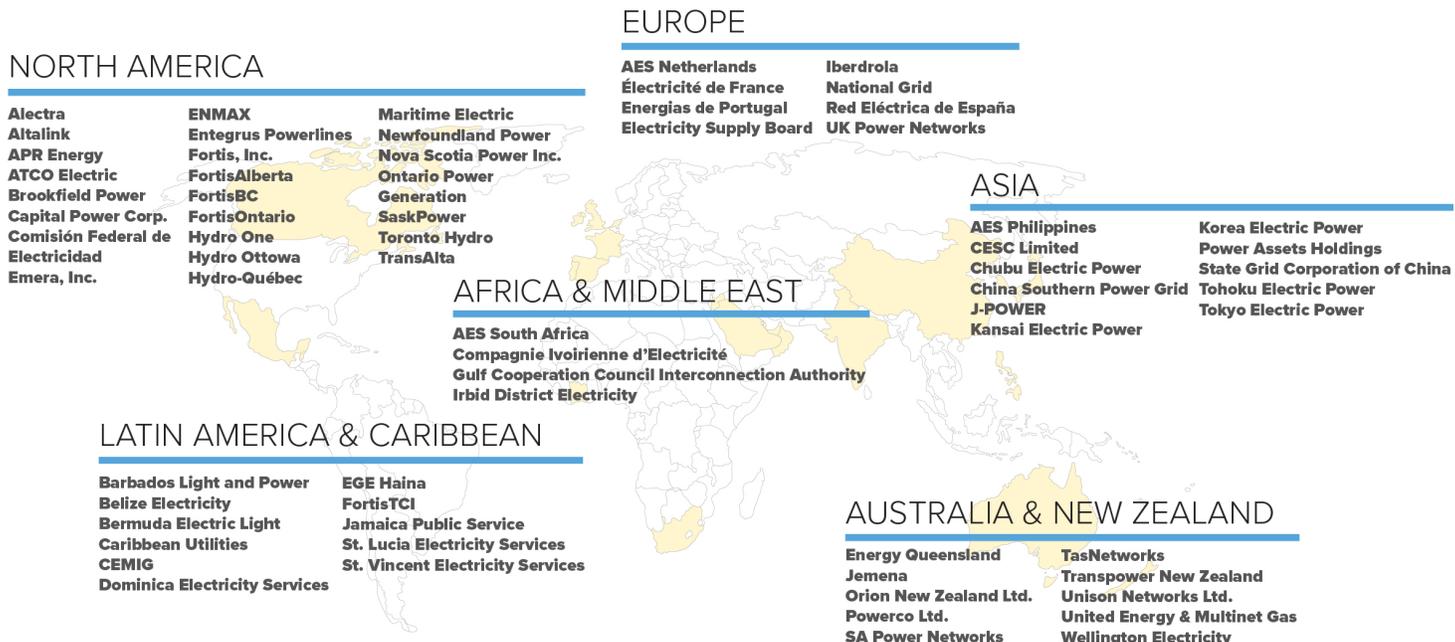

Focus Areas

EEI employs nearly 200 full-time employees dedicated to analyzing and responding to evolving industry trends in traditional and emerging topics in the electric power industry:

- Business Continuity and Disaster Response
- Centralized & Distributed Generation
- Customer Solutions
- Cyber & Physical Security
- End Use Electrification
- Grid Reliability & Resilience
- Investment / Investor Relations
- Smart Communities
- Stakeholder Engagement
- Sustainability & the Environment
- Tariff Design & Rate Base Optimization
- Technology & Business Model Innovation
- Transmission & Wholesale Markets
- Utility Regulation & Policy

EI International Member Companies

EI's International Programs serve more than 65 members with operations spanning more than 90 countries around the world.

Events & Special Initiatives

Africa Utility Power Sector Exchange (AUPSE)

Launched in 2017, AUPSE is a senior executive knowledge exchange and peer-to-peer networking platform created to advance operational excellence in the African electric power sector.

Global Electrification Forum

The Global Electrification Forum (GEF), held each Spring, is EEI's largest annual gathering of member company CEOs and senior executives from across the world and provides a unique opportunity for networking and executive dialogue.

Thomas Edison International Executive Utility Fellowship

The Thomas Edison International Utility Executive Fellowship Program supports the next generation of electric company leaders through professional development opportunities and strategic innovative research projects on emerging electric power industry trends.
