

TRADE ALLIES PRODUCTS & SERVICES

ADMMicro Inc Booths 311/313

ADMMicro's Energy Management System (EMS) is a family of intelligent, real-time monitoring devices and controls integrated into a single unit, making it easy to install, operate, and manage. The intelligent EMS systems are equipped with revenue-grade accurate metering with capabilities including component submetering, monitoring and controlling HVAC, lighting, freezer/cooler, natural gas, and more. ADMMicro offers customers with the solution to cost-effectively monitor, control and manage their facilities with "Energy Solutions You Can Count On." Contact John Richmond, VP of Sales; Toll-Free 866-800-8906 or john.richmond@admmicro.com, or visit our website www.admmicro.com

Advantage IQ Booths 208/210/212

As the leading provider of sustainable utility expense management solutions, Advantage IQ partners with our clients to assess utility, telecom, waste and lease expenses. With processing and payment, auditing, energy procurement, reporting and advanced analysis, our patented technology and services provide the critical data you need to balance the financial, social and environmental aspects of doing business. Our comprehensive integrated services go beyond expense management, delivering a total energy and environmental management solution.

Ameresco Booths 421/423

Ameresco AXIS is the premium Utility Information Management and Analytics division of Ameresco. We specialize in a multi-site approach to data management for tracking, reporting, and cost analysis of all utility information and carbon footprint tracking. We offer the most comprehensive, accurate, and relevant solutions for your billing needs. Learn more: www.amerescoaxis.com or call 509-343-5300

Amerex Booth 204

Amerex Energy Services provides the industrial, commercial and institutional clients with a wide array of sophisticated energy and energy-related financial tools designed to provide a stable platform to successfully manage risk. Amerex brings extensive industry knowledge and expertise to assist clients in achieving lower energy prices. Phone: 281.340.5210 or email: info@amerexenergyservices.com

Big Ass Fans Booth 506/507

Big Ass Fans is the leading manufacturer of 6- to 24-ft. diameter high volume, low speed (HVLS) fans. Big Ass Fans use low horsepower motors to generate year-round, energy-efficient air movement and occupant comfort and cost only pennies-per-hour to operate. For more information, visit www.bigassfans.com or call 877-BIG FANS

Broadstar Wind Systems**Booth 420**

BroadStar Wind Systems™ is changing the landscape of wind energy. With the compact design of our patented AeroCam™, wind power can be generated in environments unthinkable for conventional turbines—from urban high-rise buildings and commercial rooftops to retail buildings and wind farms. The AeroCam's smaller footprint and proven aerodynamic design make it an exceptionally versatile, cost-effective way for everyone to harness the power of wind. At BroadStar, we think it's time to move beyond how the world has always viewed energy. Phone: 214.468.8811 www.broadstarwindsystems.com

Champion Energy Services Booth 227

Champion Energy Services is a leading Retail Electric company operating in multiple deregulated markets throughout the US. Through organic growth and targeted acquisitions, Champion has developed a large customer base in the Commercial/Industrial/Institutional/Governmental/Residential vertical segments. Champion ranks in the top twenty among retail electric companies in the U.S. and in the top five among those not affiliated with a utility company.

Contact: David Visneau: Vice President of Sales, dvisneau@championenergyservices.com, 972-345-2903 or on the web www.championenergyservices.com

Cisco Systems, Inc. Booth 405

Cisco, (NASDAQ: CSCO), is the worldwide leader in networking that transforms how people connect, communicate and collaborate. Cisco's broad range of Smart+Connected Real Estate and energy management solutions for retail can be found at <http://www.cisco.com/web/strategy/retail/lean-portfolio-solution.html>. To learn more about Cisco please visit <http://www.cisco.com>.

Coleman Hines Booth 126

Coleman | Hines has earned a reputation as a "trusted advisor" through the effective management of energy procurement and consulting services for multi-site corporations across North America. We work with Energy and Business Professionals to plan, implement and execute energy strategies that reduce risk and increase profitability to achieve their energy goals. With 30,000 sites under management, our customized approach and comprehensive services incorporate Energy and Supply Management, Rebate Management Services, Utility Bill Payment, Utility Budgeting Services, Strategic Measurement and Verification Analysis and a suite of powerful online energy tools. We are an extension of your energy department, providing support and expertise in an ever-changing, complex market environment to Make Your Energy Life Easier. ConEdison Solutions Booth 410

ConEdison Solutions is a leading energy services company that provides competitive power supply, renewable energy, sustainability services, and cost-effective energy solutions for commercial, industrial, residential, and government customers. The company is based in White Plains, New York, with offices in Burlington, Massachusetts; Cherry Hill, New Jersey; Arlington, Virginia; Houston, Texas; Tampa, Florida; Durham, North Carolina; and Overland Park, Kansas. ConEdison Solutions offers programs and services designed to help customers achieve their individual energy objectives and is accredited as an Energy Services Provider (ESP) by the National Association of Energy Service Companies (NAESCO). ConEdison Solutions is a subsidiary and registered trademark of Consolidated Edison, Inc. (NYSE: ED). Phone: 1-888-210-8899 or visiting the ConEdison Solutions website at www.conedsolutions.com

Constellation New Energy Booth 120/122

Constellation NewEnergy (CNE) is a leading U. S. competitive energy supplier and serves business customers from Main Street to the Fortune 100. Our commercial, industrial, public sector and institutional customers depend on our expertise to help them make smart energy buying decisions for their business. We are a wholly-owned subsidiary of Constellation Energy (NYSE: CEG), headquartered in Baltimore, Maryland. Constellation Energy The way energy works ... for your business.
www.newenergy.com/control

CPowered Booth 119

CPower provides demand response and energy management services to multi-site national retailers, enabling them to earn market payments for temporary and permanent energy reduction initiatives. CPower serves all retail segments from big box and supermarkets to specialty retail and department stores. To learn more visit www.cpowered.com or contact Bryan Porcaro at bryan.porcaro@cpowered.com or 646-438-4979

Cree, Inc. Booth 336

Cree LED Lighting products utilize Cree TrueWhite Technology to deliver extreme energy efficiency without sacrifice. Cree's downlight, lay-in, and lamp products reduce energy consumption by up to 90% while delivering warm, natural color that renders people and merchandise beautifully. There is no toxic mercury and our products have a 50,000 hour lifetime.

Contact: Craig Lofton, Director of National Accounts, CREE LED Lighting Solutions

Direct Energy Business Booth 321/323

Direct Energy is one of North America's leading integrated energy companies and a member of the Centrica group of companies. With operations across Canada, Texas and the north-eastern United States, Direct Energy delivers C\$8 billion of energy and related services to over five million residential and commercial customers. Worldwide, the Centrica group of companies provides energy and other services through more than 32 million customer relationships. Our core businesses range from gas exploration and power generation to energy pricing and protection plans. We also offer a full line of energy-related services – including the servicing of furnaces and air conditioners – to give you one stop for all of your energy needs.

E Source Booth 221

E Source provides the in-depth energy expertise, a comprehensive repository of tools, and relevant business intelligence to help you manage and plan for your organization's sustainable energy management needs. Giving you insights and best practices for both the demand and supply sides of the energy field and their impacts on your sustainability strategies, E Source equips you to meet today's challenges, helping you:

- Manage demand and reduce your energy consumption by knowing what technologies and best practices are most effective for your applications, and helping you target them in the most cost effective manner
- Devise, implement, and manage proactive procurement strategies to control and mitigate the volatility and risk associated with energy prices

- Address environmental risks and sustainability reporting with a comprehensive corporate greenhouse gas inventory, inventory management system, and strategic climate change/energy plan.
- Visit our exhibit booth for more information or website www.esource.com

Edison Electric Institute Booth 329

The Edison Electric Institute (EEI) is the association of U.S. Shareholder-Owned Electric Companies. Our members serve 95 percent of the ultimate customers in the shareholder-owned segment of the industry, and represent approximately 70 percent of the U.S. electric power industry. We also have more than 80 international electric companies as Affiliate Members, and nearly 200 industry suppliers and related organizations as Associate Members. Organized in 1933, EEI works closely with all of its members, representing their interests and advocating equitable policies in legislative and regulatory arenas. EEI provides public policy leadership, critical industry data, market opportunities, strategic business intelligence, one-of-a-kind conferences and forums, and top-notch products and services. For more information, visit www.eei.org

Emerson Climate Technologies Booth 211

Emerson Climate Technologies Retail Solutions is a leading provider of facility management systems and facility services. For over 20 years, the company has been at the forefront of developing new technology and trends in refrigeration system and building HVAC and lighting controllers, refrigerant leak detection and more. Retail Solutions provides such valuable programs as turnkey project management, energy reduction and call center services, as well as E-Commissioning™. Retail Solutions customers are represented by most of the top supermarket, convenience and drugstore chains in the United States, Australia, South America, Europe and Asia. For information, visit www.EmersonRetailSolutions.com

EMS Electric Corporation Booth 407

Our people provide quality renovation and installation of energy saving products. We are a team of managers, engineers, and craftsmen dedicated to optimizing costs and results.

- Survey, compliance, design and installation services.

Competitiveness is the carefully planned methodical application of human resources. Making clients our partners for over twenty years.

Ice Energy Booth 100/102

Ice Energy is a next-generation clean energy technology company developing sustainable energy storage solutions for homes and businesses. The company's hybrid cooling solutions address the increasing demand for electricity by shifting the largest component of residential and commercial demand - air conditioning - from peak to off-peak periods, when energy is cleaner, more efficient, and less expensive to produce. 9351 Eastman Park Drive, Windsor, CO 80550 www.ice-energy.com

IGS Energy Booth 406

IGS Energy, America's leading independent retail supplier of natural gas is known for its energy market expertise and its ability to provide simple and clear solutions to customers of all sizes. IGS Energy presently serves more than 700,000 commercial and residential customers within the territories of 11 different natural gas utilities across seven different states: Illinois, Indiana, Michigan, Ohio, Kentucky, Pennsylvania and New York. For more information, contact our Commercial and Industrial Sales Department at 1-877-923-4447, extension 2605, or visit www.IGSEnergy.com.

Industrial Energy Services Booth 207

Industrial Energy Services, Inc. (IES) is a national electrical contractor with a focus on delivering energy saving products and installation services to our clients. We employ emerging technologies in our lighting systems that include: Ultraviolet (UVC), LED, and Electronic HID. "We call it Sustainability by Design," says Dave Fetter, President. Online at www.IESNational.com

Integrys Energy Services Booth 103/105

Integrys Energy Group operates several regulated natural gas and electric utilities. Integrys Energy Services is headquartered in Green Bay Wisconsin. It is a diversified energy company offering energy supply, risk management, energy information management and consulting services to meet our customers' energy needs. Our primary focus is serving retail electric customers in deregulating electric markets, but we participate in wholesale trading to gain market intelligence. As a wholesale gas supplier, we create value as a solutions provider to all participants in the natural gas supply chain: producers, utilities, pipelines, power generators, storage owners, and marketing companies. Our company has expertise in the value chain association with the production and delivery of electricity, from wholesale electric origination to asset management. We operate a 24/7, "energy desk" to provide real-time monitoring and management of the volatile energy markets. Contact: Integrys Energy Services, Inc., 1716 Lawrence Drive, De Pere, WI 54115; Phone: 920-617-6100; Email: sales@integrysenergy.com

Janmar Lighting Booth 320

Janmar Lighting is a niche specialty lighting corporation focused in the design, engineering and manufacturing of application based energy efficient compact fluorescent and "T" CMH lighting solutions manufactured in the United States for specialty, multiple, track and recessed applications for new construction, remodel and retrofit installations for the commercial, grocery, restaurant, hospitality and retail markets.

Liberty Power Booth 223

Liberty Power is a leading independent electricity supplier, with licenses in 16 of the 21 deregulated markets. Liberty is also the only nationally-certified, minority-owned supplier in the industry. Backed by one of the world's leading financial institutions, Liberty Power offers cost-effective energy solutions paired with innovative product development and outstanding customer care. Connect with Liberty Power for low-cost, reliable electricity choices. Please visit our Web site at www.libertypowercorp.com or Contact: Nelson Reyneri: Vice President, National Account Sales: 954-598-7032 1901 West Cypress Creek Road, Suite 600, Ft. Lauderdale, FL 33309

Lighting Control & Design Booth 301/303

Lighting Control & Design manufactures simple, yet flexible lighting controls. The heart of our lighting controls is the GR 2400 system. A single system ideal for any size application from a parking lot to a retail store to a high-rise building, our scalability eliminates complex choices. The GR 2400 System is a 100% digital solution to lighting control. We offer a wide breadth of products ranging from dimming interfaces to building automation interfaces to digital thermostats all within a single system. The GR 2400 system was developed as a complete vertically engineered package. www.lightingcontrol.com

Lightstat Booths 228/230

Lightstat, Inc. is a manufacturer of energy management controls designed to reduce energy consumption. Our line of communicating controls is designed for installation in the light commercial and residential markets. Both one-way and two-way communications facilitate demand response and curtailment applications. All Lightstat products are designed to be easy to implement, and easy to use. Contact us on the web www.lightstat.com or call 800-292-2444

Loyalton Group (The) Booth 331

The Loyalton Group puts experienced energy professionals to work solving the most pressing energy concerns of today's commercial, educational and industrial enterprises. From daily bill management, energy procurement, facility optimization and long-term carbon management, our expertise can elevate profits, reduce costs, manage risk, and enhance sustainability. The Loyalton Group, 1620 South Frontage Road, Suite 200, Hastings, MN 55033 www.loyaltongroup.com

LPB Energy Management Booth 117

LPB Energy Management is a full-service energy management firm that believes the solution to sustainable energy management is attained through utility data and accountability. LPB has found that a single bill, when analyzed, contains all of the data necessary for any effective energy management program. LPB's in-house expertise and award-winning software offer clients the ability to save on electricity, water and natural gas rates, reduce consumption and measure usage. By analyzing utility billing data, LPB has helped over 1000 nationwide clients reduce their usage. Headquartered in Dallas, Texas, LPB has over 150 employees in offices in Texas, Illinois, New York, New Jersey, South Carolina, California, D.C. & a Service Bureau in Olympia, WA. LPB is proud to have been awarded a GSA contract, ENERGY STAR® Partner of the Year and received the Continuing Excellence award. For more information about LPB Energy Management, please visit www.lpbenergy.com

Munters Booth 130

Munters is a global leader in energy efficient air treatment solutions. Munters manufactures products that can economically control humidity and temperature, provide energy recovery, and/or utilize direct or indirect evaporative cooling for comfort, process and environmental protection. Visit our website: www.munters.us or contact: Jacob Burkholder 210-602-5817 or jburkholder@munters.com

National Information Solutions Cooperative (NISC) Booth 424

NISC's Utility Bill Pay service provides an aggregated billing solution for companies with multiple locations and a total outsourcing solution for utility payables. It helps accelerate invoice processing, assuring prompt vendor payments and allows you to view and analyze consumption data using our web based reporting tool.

New Jersey Smart Start Buildings Booth 106

NJ SmartStart Buildings is the commercial & industrial component of the NJ Clean Energy Program, offering technical assistance, design support and significant financial incentives for premium energy efficient equipment in new construction and retrofit projects throughout the state. The program includes heating and cooling, lighting, motors and drives, water heating, and a custom measures track. Visit njcleanenergy.com/ssb for details.

Novar/Honeywell Booth 413

Novar, a division of Honeywell, is the global leader in multi-site energy management. Novar provides comprehensive consulting, technology, enterprise software, and services to support our customers' sustainability strategies, improve their operational efficiencies and add significant savings to their bottom lines. That's why more than 65% of the top multi-site retailers chose Novar. www.novar.com

Optimum Lighting Booth 220/222

Optimum Lighting is a distinctly different Fixture Manufacturer designing New Fluorescent Lighting Technologies for a Broad Range of Energy Efficient Solutions (including HID to Fluorescent). Our Fixtures are used for a variety of applications including: Retail, Distribution, Warehousing, Retrofits, HID replacements and fluorescent conversions. Optimum concentrates on Integration of Material and Technology, customizing our product to meet individual lighting needs while maximizing Energy Savings. Contact: 800-541-9082 or www.optimumlighting.com

Orion Energy Services**Booth 325**

Get OFF the GRID! Orion has seamlessly integrated the commercial-grade rated Apollo® solar light pipe and Compact Modular™ lighting technology with its IntelLite® wireless control systems to create a proven hybrid system that delivers superior lighting at minimal cost. Orion has earned numerous patents and is a recognized, award-winning leader in energy efficiency. Go to our website to learn more about how Orion is changing the way people think about energy and lighting. Orion Energy Systems Inc. www.oesx.com Nasdaq: OESX

OSRAM Sylvania**Booth 128**

OSRAM SYLVANIA is the North American lighting operation of OSRAM GmbH, together we are the second-largest lighting/materials enterprise in the world. We manufacture and market a full range of energy efficient lighting products, systems solutions and lighting maintenance services, sold primarily under the SYLVANIA brand name. www.sylvania.com

Pace Controls**Booth 404**

PaceControls delivers energy savings in HVAC and Refrigeration energy savings without set point changes. PaceControls' proven and patented technology establishes optimal run times for compressors and burner units, "pacing" the equipment's consumption of electricity, natural gas, fuel oil or propane ... reducing current energy costs by 10-20 percent (or more), with a typical payback of less than 2 years, as shown by over ten thousand installations and years of performance. As an ENERGY STAR Partner, PaceControls is committed to delivering the most cost-effective energy saving solution for existing and new heating, cooling and refrigeration equipment. www.pacecontrols.com

Roth Bros Booth 304/306

Mounting social, competitive and financial pressures have national (multi-site) corporations scrambling to green up. But as we all know, it's not easy being green. Roth is the one-source solution to develop a Comprehensive Energy Strategy for national retailers. Roth is headquartered in Youngstown, Ohio and maintains branch offices throughout the United States. On the leading edge of technology and performance in Energy Management, Electrical Services, HVAC Service, HVAC Construction, Roof Management, and Performance Contracting, Roth is positioned like no other building services and construction company in the industry, and is committed to fulfilling the intricate needs of its customers. For more information, please visit us at www.rothbros.com.

San Diego Gas & Electric Booth 327

SDG&E® has many programs and services available to help you save energy in every room of your home. From rebates on ENERGY STAR® appliances to refrigerator recycling incentives, discounted lighting and more. It's easy to Go Green and Save Green. Visit sdge.com or call SDG&E's Energy Information Center at 1.800.644.6133.

Site Controls**Booth 412**

Site Controls is the leading provider of enterprise-wide energy management and facilities intelligence solutions for chain retailers and branch banks. Site Controls' Site-Command™ above-site energy management platform monitors and controls major energy-consuming devices such as HVAC, lighting, refrigeration, signage and more to drive down energy and maintenance costs. Site Controls energy management solutions incorporate energy efficiency, corporate social responsibility, comfort and controls, operational intelligence, and demand response services. By providing persistent real-time access, visibility and control over thousands of assets and sites, Site Controls helps chain retailers and branch banks create a compelling customer experience while simultaneously saving money, reducing emissions, and improving business efficiency. For more information about Site Controls, visit www.sitecontrols.com or contact Kellie Thomas at kthomas@sitecontrols.com
