OVERVIEW

America's investor-owned electric companies keep customers at the heart of their every decision, investment, and innovation.

We've heard from customers loud and clear: They want to know what we're doing to keep electricity as affordable as possible.

We are working every day to keep costs down and expand the help available to customers. The pages that follow show what that looks like in practice.

Our member companies are on the ground in every community they serve, working directly with customers to connect them to assistance programs, flexible payment options, and the resources that can help. From efficiency initiatives and home energy upgrades to direct bill assistance and flexible payment options, companies work side-by-side with customers to help them understand their options and take advantage of the resources available to them. We know these efforts don't erase the pressure many families feel—but they make a real and measurable difference, and we're expanding them.

EEl and our members are also going after the drivers of rising costs on several fronts. Among other efforts, we're advocating for permitting reform to bring new supply online faster to meet historic energy demand,

supporting large-load tariff agreements that make sure technology companies and other big users of electricity pay their fair share, and pushing for market reforms in regions like the PJM Interconnection, where more generation is urgently needed. At the same time, electric companies are working to make bills more transparent and to reduce charges they don't control, such as taxes, fees, and government-set surcharges.

We're also making necessary investments in the grid to better withstand severe weather — because building a more resilient system now helps avoid the far greater costs of storm damage and outages down the road, keeping electricity more affordable over the long run.

The programs highlighted in this report reflect a simple truth: We thrive when our customers thrive. We're committed to serving them as we power innovation and America's economic and national security, today and for years to come.

WEST ▶ ●●●●●●

HAWAIIAN ELECTRIC

Hawaiian Electric has provided direct bill credits to customers affected by the Maui wildfires and Kona Low storms, including credits of up to \$500 for eligible Maui customers. The company is also working on implementing new programs for customers, in addition to providing a smart renewable energy program for low-to-moderate-income customers and information about wildfire safety.

Kōkua for Maui

Hawaiian Electric is offering customers who need financial assistance on Maui with Take advantage of this opportunity to reduce your balance and make managing your bill easier.

- ◆ For a limited time, you may qualify for a special offer to receive a bill credit between \$200 and \$500.*
- ◆ This one-time credit would be applied to your account in March 2026 (may be applied to your electric bill you receive in April or May, depending on timing).
- ◆ Offer valid to customers with a past due balance of \$1,000 or more.

To take advantage of this offer, simply sign up for a special 24-month payment plan or stay current on your existing payment plan.

Sign up at hawaiianelectric.com/kokuacredit

*This offer is exclusive to Maui customers with unpaid balances of \$1,000 or more on their account as of the date of the offer. The credit amount will be based on the number and service address and is not transferable. The credit amount will be based on the total funds set aside for this special offer, your past due bill amount, and successful completion of the 24-month payment plan.

Impacted by Recent Kona Low storms and Need help?

Need to get electrical service reconnected?

For your safety, and to reduce the risk of electrical hazards such as shock or fire, we are asking that you arrange for a licensed electrician to do the following:

- ◆ Inspect your electrical system; and
- ◆ Provide written certification (example included) confirming that all affected components have been properly inspected, any necessary repairs have been completed, and the system is safe to re-energize.

Enhanced Fast Trip and Block Reclosing

 Sensors detect a problem and automatically shut off power instantly for safety and to clear hazards.

In wildfire risk areas:

- ◆ Power does NOT automatically turn back on.
- ◆ An inspector must visually inspect the entire line before restoring power.
- ◆ Outages may last longer, especially at night or in remote areas.

Public Safety Power Shutoff (PSPS)

 A PSPS is a process to manually and proactively turn off power to protect communities and property in severe and hazardous weather, when the danger of wildfire is high.

Before, during and after a PSPS, we will work closely with emergency responders and critical service providers and keep the public informed.

What happens before, during and after a Public Safety Power Shutoff?

 PSPS Watch Up to 24-48 hours before a possible PSPS Customers in PSPS areas should activate emergency plan, keep home survival kit handy.
 PSPS Warning Inminent to 4 hours before a possible PSPS A PSPS event is likely. Power may be shut off with little or no notice.
 PSPS Outage During a PSPS Power is shut off only in high wildfire risk areas for the safety of the community.
 Restoration Begins When it's safe Crews will restore power once it's safe, which may take hours or even days depending on the extent of damages.
 Restoration Complete PSPS is over The immediate threat has passed and power has been restored.

PSPS Hotline: 1-844-483-8666 toll-free

PACIFIC GAS & ELECTRIC

Pacific Gas & Electric has reduced residential bundled electric rates five times since January 2024, bringing residential rates for its most vulnerable customers down 23 percent. For other residential customers, rates have decreased 13 percent over the same period. The company offers several programs to help customers manage energy use and bills and to help income-eligible customers lower their bills through bill credits and discounts.

PG&E's Energy Action Guide helps customers find personalized recommendations, rebates, and energy-saving appliances for their homes. Customers can also participate in PG&E's Home Energy Checkup, a free tool that shows customers how much of their home energy goes to heating, hot water, appliances lighting, and other uses, and gives personalized ways to save energy and money.

WEST ▶

PORTLAND GENERAL ELECTRIC

Portland General Electric is helping customers manage energy costs by keeping system costs and prices as low as possible while providing programs that can lower individual bills and support customers in need. The company connects qualifying households with monthly bill discounts, educates customers on how their dollars support grid investments, and uses Flex Power campaigns to encourage customers to help manage energy use during peak demand.

The FlexPower campaign is a multi-channel outreach campaign that highlights how customer participation helps PGE safely and reliably balance the grid during peak demand.

PGE's Customer Dashboard helps customers monitor and manage their energy use, program participation, and bills.

WEST ▶

PUGET SOUND ENERGY

Puget Sound Energy is taking a community-based approach to connecting customers with bill assistance and energy-saving programs, partnering with libraries, food banks, Tribal communities, affordable housing providers, and other trusted organizations. The company also provides multilingual support, paper applications, and one-on-one enrollment assistance to help customers overcome barriers to participation.

AMERICAN ELECTRIC POWER

American Electric is investing in its system to support record energy demand while protecting existing customers. Large customers are paying for the grid infrastructure that serves them through agreements with AEP's operating companies and innovative rate structures, which are expected to offset up to \$16 billion in costs for existing customers in its vertically-integrated electric companies over the life of the contracts.

Indiana Michigan Power (I&M), an AEP subsidiary, recently filed a plan to reduce Indiana residential customer bills by approximately \$59 million in 2027 and provide three years of stability. I&M also offers resources to help customers better understand their bills and to manage costs through its Bill Support Center, including a bill analyzer tool. Other AEP operating companies across its 11-state service territory are planning to launch similar tools for their customers.

NATIONAL GRID

National Grid's Consumer Advocacy teams work directly with customers and community organizations to raise awareness of available assistance programs, provide one-on-one support, and connect households with resources that help make energy bills more manageable. Between January and September 2026, the teams conducted more than 900 in-person outreach events and helped more than 36,000 customers across New York and Massachusetts access financial assistance, support programs, and other available resources.

nationalgrid

National Grid provides direct support to help customers facing hardship connect with financial assistance, payment plans, and community resources.

Customer Support in Action

"What a relief, you don't know how grateful I am."

National Grid consumer advocates work directly with customers and community organizations to help households navigate benefits, identify available financial assistance, connect with local services and establish payment options that can ease financial strain. In New York, the Consumer Advocacy team recently reported since January 2026, assisting 7,076 households, conducting 163 outreach events and helping customers reduce outstanding balances by more than \$1.7 million through affordability programs and support resources.

Consumer Advocate Support

Direct support helps customers facing hardship connect with financial assistance, payment plans and community resources.

Affordability Programs

National Grid continues to support eligible customers through programs such as income-based discount rates and energy affordability support.

Community Partnerships

Helping Customers Manage Costs and Access Support

National Grid supports customers through a range of programs, communications and community-based support designed to help them manage energy costs, access financial assistance, improve energy efficiency and make informed decisions about their energy use. Through customer education, bill assistance outreach, energy-saving events, targeted affordability communications and direct support from consumer advocates, we connect customers with resources that can help lower energy burden and provide practical support when they need it most.
