A Green Energy Future, A Clean Energy Society

As America's electric companies, we are working to create a green energy future, while ensuring a clean energy society. By delivering clean energy and climate goals while delivering resilient and affordable electricity to customers, we are making a positive impact on our communities.

FOCUS ON AFFORDABILITY

Customers want to see their energy bills rise, and we are working hard to ensure that their needs are met. EEI's member companies also are developing new payment programs and expanding access to state and federal energy assistance resources. We are committed to helping eligible customers access these resources, and we are working with elected officials, state agencies, community advocates, and other stakeholders to help support those in need.

EEI's National Key Accounts Workshop

 EEI's semi-annual National Key Accounts Workshop is the venue where national and state key accounts professionals gather to discuss industry trends and best practices for tackling all of their energy-related needs. This year's workshop will be held on February 15-17, 2023, in Washington, D.C. Register today to secure your spot!

Global Electrification Forum

EEI's Global Electrification Forum (GEF) is an annual event that brings together leading experts to explore the pathways and actions that electric companies are pursuing to realize their clean energy and climate goals. This year's GEF will be held on April 10-12, 2023, in New York City. Registration will open soon, so plan now to attend.

EEI Celebrates 90 Years of Power by Association

For 90 years, "Power by Association" has been the driving force behind EEI. In the past year, we have continued to prioritize our members' needs and work towards a clean energy future. We strive to provide electricity to foster economic progress and improve quality of life for customers.

Top Story

"We have fully embraced a strategy that will deliver a clean energy future," said EEI President Tom Kuhn. "This isn't just a concept that we talk about; we are backing up our actions with concrete plans." Kuhn highlighted EEI's commitment to sustainability and resilience, as well as its efforts to address the energy crisis. He emphasized the importance of collaboration with state and federal governments and asked for continued support from all stakeholders.

Infrastructure Law and the Inflation Reduction Act

"This is a day of celebration," said EEI's Board of Directors Chairman, William "Bill" Phillips. "The Infrastructure Law and the Inflation Reduction Act are game-changers for the energy industry. We are grateful for the leadership of our members, policymakers, and stakeholders who made this possible." Phillips congratulated EEI's Board of Directors for their leadership and for pushing for the best for America's electric companies.

EEI's Board of Directors has presented the Thomas A. Edison Legacy Award to two accomplished energy leaders: former White House National Climate Advisor Regina McCarthy and former National Oceanic and Atmospheric Administration (NOAA) Administrator and EEI's Board of Directors member, Jane Lubchenco. "We are proud to recognize their outstanding contributions to the energy industry," said EEI's Board of Directors President, Michael S. New. "Their leadership has been instrumental in shaping the industry and what he calls an unprecedented time for the industry, as well as their hopes for the future.

EEI's President and CEO, Tom Kuhn, also outlined industry priorities for 2023, particularly advocating for "a coordinated, consistent, and efficient siting and permitting regulatory framework to facilitate accelerates the demonstration and deployment of new carbon-free technologies. They provide critical cost savings for customers, strengthen U.S. energy infrastructure, and

Recommended Reading

"What you are will show up in what you do," said industry expert, Steven F. "Steve" Baxter. "We must continue to work towards a clean energy future, and we must do so with integrity and passion." Baxter emphasized the importance of collaboration and innovation to achieve these goals. He also stressed the need for continued support from all stakeholders to make this happen for every customer and every community.

EEI's National Key Accounts Spring Workshop

EEI is excited to announce the dates for its National Key Accounts Spring Workshop. The workshop will be held on May 16-18, 2023, in Washington, D.C. EEI is committed to providing the highest level of service and support to its members. We value the relationships we have built with our members and are dedicated to helping them achieve their goals.

Save the Date

EEI's May 6-8 Meetings is in June

EEI is excited to announce the dates for its May 6-8 Meetings. The meetings will be held in June. We look forward to seeing all of our members there and discussing the latest trends and developments in the energy industry.

Electric Perspectives

"I am proud of all that we have achieved for our customers through the Power by Association," said EEI President Tom Kuhn. "We have worked hard to ensure that our customers have access to reliable, affordable, and clean energy. We are grateful for the support of all stakeholders who have made this possible." Kuhn also outlined industry priorities for 2023, particularly advocacy for "a coordinated, consistent, and efficient siting and permitting regulatory framework to facilitate accelerates the demonstration and deployment of new carbon-free technologies. They provide critical cost savings for customers, strengthen U.S. energy infrastructure, and
