IN THE NEWS
Several EEI member companies are involved with LDES projects that are receiving natural disasters,” Granholm said. ‘“We need to ensure stronger, more resilient communities.” The funding—made available through the Bipartisan Infrastructure Law—will support a funding of $325 Million in DOE LDES Funds

EEI Member Company Projects Among Recipients

The completed project will consist of 62 wind turbines and will generate more than 800 megawatts of energy. The project is scheduled to begin construction in late 2023 and conclude in late 2026.

EEI member company CEO Andrew Baldwin said, “The Vineyard Wind project is a significant step forward in demonstrating the feasibility of offshore wind as a reliable, affordable, and clean energy source.”

Vineyard Wind 1 is the first commercial-scale offshore wind project in the United States. It has been awarded a 30-year contract to deliver safe, reliable, affordable energy to our customers,” he writes.

EEI and our member companies are investing in smarter, stronger, and cleaner energy infrastructure that is helping to drive down carbon emissions. Today, more than 40 EEI member company CEOs, will focus on how the Bipartisan Infrastructure Law and COP28

EEI is proud to join with the Center for Climate and Energy Solutions and the Business Council for Sustainable Energy to host one of the few private-sector events taking place leadership and the transformation of the U.S. economy.

EEI leaders and member company executives will be at COP28 to participate in a variety of official events highlighting the electric power industry's clean energy

November 30 to December 12 for the UN Climate Change Conference, or COP28.
