There are more than 1.6 million electric vehicles on U.S. roads.

As cities and communities seek smart, sustainable mobility solutions, electric transportation is a critical component. EEI's member companies—America's investor-owned electric companies—are partnering with automakers, technology companies, and many other stakeholders to support the growth of electric transportation and to develop needed EV charging infrastructure.
Electric transportation is a win for our nation, helping to meet customer needs, providing environmental benefits, and supporting America’s energy security.
