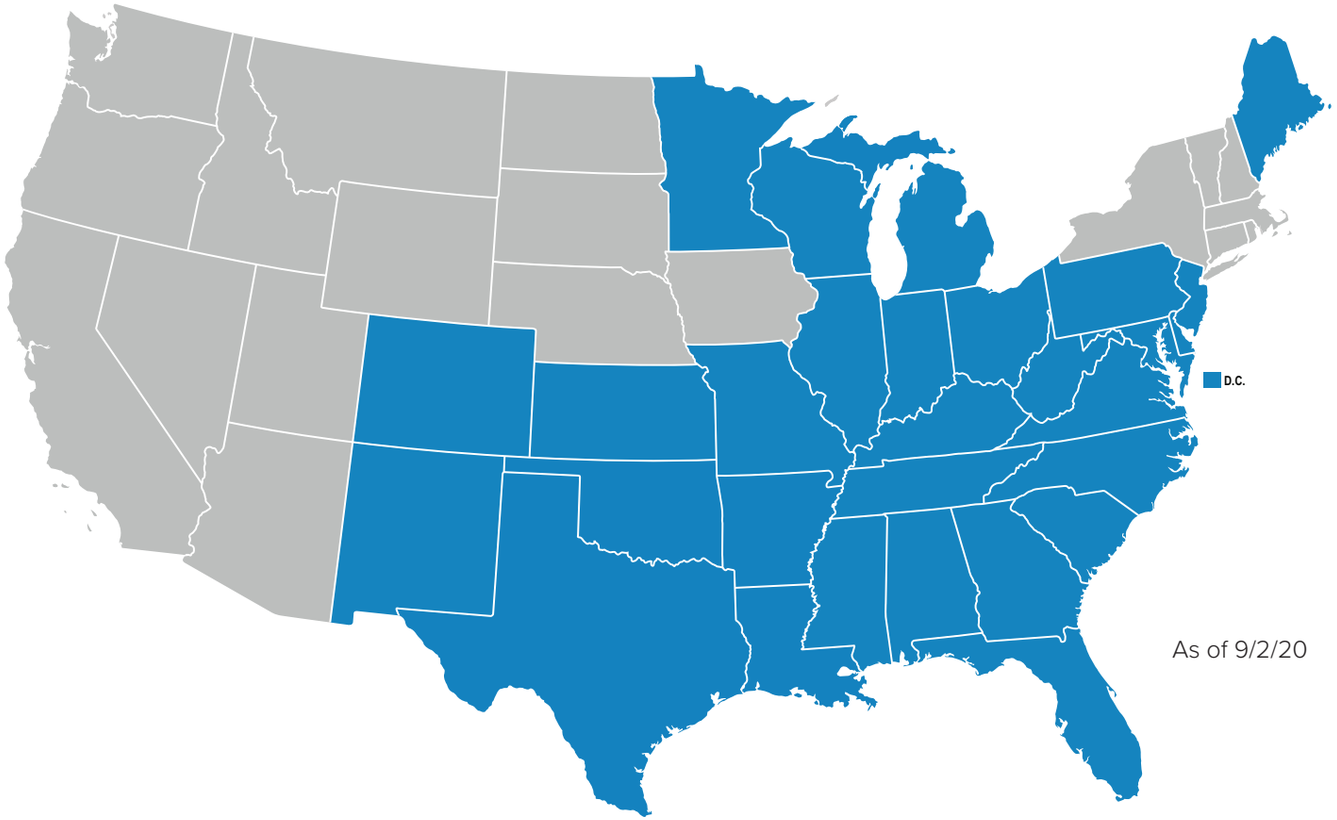
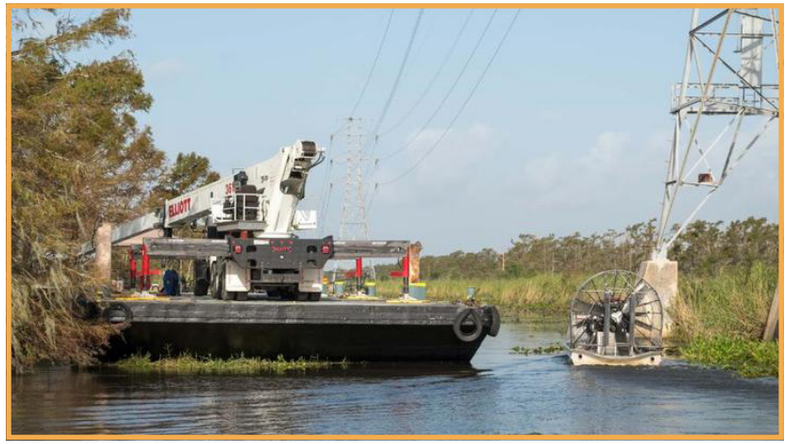
# Hurricane Laura:
# Mutual Assistance Networks Activated



As of 9/2/20



Less than a week after Hurricane Laura's destructive winds ripped across Louisiana and parts of Texas, Mississippi, and Arkansas, **electricity has been restored to approximately 737,000—or 75 percent of—customers impacted by this historic and devastating storm.**

**An army of at least 29,000 workers from 29 states, D.C., and Canada** is working to restore power as safely and quickly as possible. Crews are following additional safety protocols required by the ongoing COVID-19 pandemic to keep themselves and customers safe. When you see crews working, please keep them safe and healthy by practicing social distancing.
